Impress your guests with digital eREG

Samsotech eREG is an easy to use Electronic RegCard, Digital Folio & Signage system. It is ideally suited for the hospitality industry and helps users in reducing operational costs associated with printing and photocopying of the RegCards and Folios by going digital, thereby improving organizational efficiency and a commitment towards becoming an eco-friendly organization by going green. Samsotech eREG consists of an iPad, a digital pen and a web based application for document archival. The system also supports doing in-room or lounge check-ins as well as emailing signed folios to the guest email address provided.

Guest arrives for check-in / check-out

FO presents the RC/Folio on the iPad

Guest signs the RC/Folio on the screen instead of paper

RC/Folio is saved in the database
